CASUAL FURNITURE

VOLUME 19
2022-2023

SUPERIOR Service

EXCEPTIONAL Value

HIGH Quality

STYLISH

Alfresco Home designs, develops, and distributes outdoor lifestyle products for the casual furniture and garden industries.

We provide stylish, comfortable, and high quality products at an exceptional value to ensure the enthusiasm and profitability of our customers.

We pride ourselves on the experience of our team, the creativity of our process and the superior service we deliver.

We operate from a long-standing tradition of family and community, and treat every customer, colleague and business partner as part of that collective family.

Alfresco Home honors the sanctity of the family table, the beauty of the garden, and the joy that outdoor living brings families around the world.

CASUAL FURNITURE

If you haven't seen Alfresco Home lately, it's time to take another look!

Proudly presenting Casual Furniture, the creative development team at Alfresco Home has inspired generations of outdoor lifestyle enthusiasts. Our comprehensive selection of original, stylish, and comfortable outdoor furniture has what your customers are seeking today.

Now in our 19th year, we are excited to share our most extensive line up ever!

Clean sophisticated collections? **Check.**

Cozy, traditional ensembles? **Yep!**

Value driven or limited space assortments? **Yes, we even have those!**

At Alfresco Home, you can easily put together your store's own unique, vibrant offering that will minimize your efforts and maximize your profits, while still being able to offer your customers one of the most eclectic and on trend assortments available today! We offer casual furniture in extruded and cast aluminum, Everwoven™ all-weather wicker, EverTeak™ composite, SVLK Certified premier teak, FSC Certified teak, and more. We stock quick ship cushion options in Sunbrella™ as well as Sunbelievable™ and other 100% solution-dyed fabrics.

Alfresco Home casual and accent furniture, easily moves from outdoors to indoors, creating elegant yet practical living spaces and havens for relaxation. In these times of profound change, we see so clearly that our homes are our sanctuaries and our outdoor places, our breathing spaces. Today more than ever, we are embracing the outdoor living lifestyle, the earth, our gardens, our friends and families. Your customers turn to you to help make all of that happen. Look to Alfresco Home for your best solutions. We will all be better for the essential roles we play in sharing the comfort of home and the beauty of the patio.

Salute

ALFRESCO HOME

316 SERIES
EVERTEAK COLLECTION

This groundbreaking and unique engineered polymer material features an extremely realistic wood-like appearance and texture with minimal if any maintenance typically required for a real wood product.

Shown: San Simeon Deep Seating in Alpaca Finish

ALFRESCO HOME

316 EVERTEAK COLLECTION

EverTeak™

FEATURES

- Innovative engineered polymer composed of unique virgin plastics
- Unmatched realistic wood beauty and feel
- Surface color through full board slat
- Manufactured with premium UV inhibitors
- High strength material stabilized with aluminum in longer board spans
- Water repellent surface minimizing moisture absorption
- Fully recyclable material

ALFRESCO HOME

316 EVERTEAK COLLECTION

EverTeak™

BENEFITS

- Environmentally friendly
- Strong, durable with minimal maintenance
- Looks and feels like natural wood
- Aluminum supports prevents warping in tables and other long spans
- Natural and minimal fading occurs. Color throughout board slat helps maintain original appearance over time
- PPE material and surface finish helps reduce stainability and makes timely clean-up routine with all-purpose household or patio furniture cleaners
- Minor repairs simple with scouring sanding pad

Features and Maintenance EverTeak™

ALFRESCO HOME
Outdoor Living Made Easy

EverTeak™ (316 Series) is made of a proprietary blend of Polystyrene (PS) and is engineered using a polymer composed of unique virgin plastics. It contains no cellulose-based fibers, which makes it a perfect material for outdoor furniture. This product is constructed using stainless steel hardware.

EverTeak™ Beauty

EverTeak™ has the appearance and touch of natural teak. Each piece is also simulated with natural wood grain details, both on the surface and within cross sections.

The EverTeak™ manufacturing process is carefully executed to produce a slight and unique variation in color for each piece, further resembling natural wood. Additionally, the depth of the color also varies depending on lighting spectrums and viewing angles.

EverTeak™ Features

- Innovative engineered polymer composed of unique virgin plastics
- Unmatched realistic wood beauty and feel
- Surface color through full board slat
- Manufactured with premium UV inhibitors
- High strength material stabilized with aluminum in longer board spans
- Water repellent surface minimizing moisture absorption
- Fully recyclable material

EverTeak™ Benefits

- Environmentally friendly
- Strong, durable with minimal maintenance
- Looks and feels like natural wood
- Aluminum supports prevents warping in tables and other long spans
- Natural and minimal fading occurs. Color throughout board slat helps maintain original appearance overtime
- PPE material and surface finish helps reduce stainability and makes timely clean-up routine with all-purpose household or patio furniture cleaners
- Minor repairs simple with scouring sanding pad

EverTeak™ Ease and Care

EverTeak™ requires no painting, staining, or waterproofing. Consumer may choose to apply a commercially available outdoor synthetic wood protectant for maximum protection.

EverTeak™ surface is resistant to alcohol, juice, and coffee spills under normal use and does not stain from common household liquids. Cleaning is simple – a mild soapy solution with a soft cloth is usually sufficient to remove dirt and debris.

Oil stains (plant and animal-based oil) on the surface can be removed by using a soft-bristled brush to clean with baking soda or non-abrasive cleaners.

While typically resistant to household liquids and stains, it is important to clean your EverTeak™ furniture regularly and not allow residue to build up on the surface that will make cleaning more difficult.

Everyday scratches and scuffs are normal and can be repaired using a scouring pad to sand lightly with the grain. Deeper gouges require the use of wood putty to repair.

Care should be taken not to place hot objects like pots, pans or grill tools on EverTeak™ as they will scorch the surface.

EverTeak™ Durability and Testing

All EverTeak™ materials have been specifically designed and rigorously tested for outdoor environments. Given normal use, we are pleased to provide 3-year limited residential warranty on the synthetic wood against defects in materials and workmanship that impair the use of the product.

Range of Temperature: From -10° to 158° Fahrenheit (Results from compressive and flexural strength testing with SGS approval)

UV Inhibition: Four years of exposure to sunlight (Xenon arc 300 W UV simulator for 448 Hours)

ALFRESCO HOME

40 SERIES PLEASURE COLLECTION

This modern, European inspired, designer outdoor collection is manufactured using materials including Biculair woven wicker, teak and aluminum for contract or residential use with its sleek, bold and elegant style.

BICULAIR® EVERWOVEN™

Apple Bee furniture collection by Alfresco Home is entirely handmade. The frame is manufactured from aluminum, with no concessions made in wall thickness or finish. The welds are of first-rate quality, the screws are of high-grade steel, and the frame is anodized in a matte or high-gloss finish, or treated with color epoxy. A unique feature of the range is that the frames are interwoven with special Biculair® Everwoven™. Biculair Everwoven was originally developed for professional use. This highly durable imitation rattan fiber (HDPE) is fully weather-resistant, colorfast, recyclable and environmentally friendly. This means that the appearance and performance of the furniture is not affected by weather conditions and that the colors retain their natural quality, even better than real rattan! The top-class quality of Everwoven™, tested by the Netherlands Organisation for Applied Scientific Research (TNO), stands out against that of other somewhat comparable wickerwork.

LIGHT WEIGHT CONCRETE (LWC)

Light weight concrete has a core of fiber reinforced cement board. Throughout the world, this is also used for facade panels to decorate exterior walls because of its many advantages. It's very strong, durable, stable and it can withstand the elements water and fire. We have chosen the same material for our light weight concrete tops, making these tops solid, stable and -unlike other resin materials- Our Lightweight Concrete tops perform very well under all kinds of weather conditions. The combination of a beautiful design and this quality material ensures that our Lightweight Concrete tables provide many years of enjoyment.

BEE WETT® CUSHIONS

PREMIUM TECHNOLOGY

Apple Bee furniture collection by Alfresco Home is made of the highest quality materials. The same certainly applies to the cushions. Our BEE WETT® range consists of special weather-resistant cushions that you can simply leave outside. The removable cover is made of the best possible materials, which are all washable. As well as being waterproof, the material is also guaranteed to be UV-resistant. Unlike normal foam, the unique BEE WETT filling does not absorb moisture. The open fabric structure on the bottom of the cushion drains all moisture perfectly. This ensures that your BEE WETT cushion dries incredibly quick compared to other cushions. The BEE WETT cushion is upholstered with an Olefin material that is resistant to rot and fungus, but is also UV-proof, soft, comfortable and damp-proof. The BEE WETT-line features premium technology on the cushions, which ensures that the cushions dry quickly after heavy rain.

The open fabric structure on the bottom of the cushion drains all moisture perfectly

Care

For many years, we have been supplying Apple Bee furniture together with the highest-quality, care-friendly BEE WETT® cushions. One of the surest ways to extend the life of these attractive cushions is to maintain the fabric correctly. This can be done simply by brushing off dirt before it becomes embedded in the fabric fibers and to immediately remove spilled liquids and other substances. Do not use any caustic cleaning agents or chlorine. You can leave the cushion covers to soak in a soap and water solution and/or wash them in a cool water delicate fabrics setting. Always rinse out the covers thoroughly! In order to retain the cushions' water-repellent layer you can add a little ScotchGard or similar to the last rinsing.

Do not put the cushion covers in a spin dryer or dryer and do not iron them. As soon as the washing machine program is finished, immediately replace the wet cover around the cushion filling so that the natural elasticity of the fibers will pull the cover nice and tight around the filling as it dries.

A photograph of an outdoor patio furniture set. The set includes a three-seater sofa, two armchairs, and a coffee table, all made of brown wicker with beige cushions. The furniture is arranged on a concrete patio in front of a house with white siding and a set of white French doors with multiple glass panes. A large potted plant is on the right, and a vase of pink flowers is on the left. A white pillar is in the foreground on the left. The text 'ALFRESCO HOME' is overlaid in the upper left, with a decorative line below it. Below that is '353 SERIES' and 'EVERWOVEN™ COLLECTION'. In the lower left, there is a paragraph of text: 'Curated traditional collections featuring Everwoven™ all weather wicker on aluminum frames.' The bottom right corner has the website 'alfrescohome.com | 135'.

Alfresco Home offers stunning cushion options that are designed for outdoor living.

Quick Ship Cushions:

Many of our top-selling dining and deep seating casual furniture collections are available through our Quick-Ship program. Classic fabrics and fast delivery make these beautiful cushions a successful solution for your business!

Factory Supplied Cushions:

Most of our casual furniture collections come with factory supplied cushions that offer outdoor quality solutions at an excellent value. To ensure high levels of colorfastness, our factory supplied cushions are covered in 100% solution-dyed fabrics. UV stabilizers in their fabrics enable these cushions to withstand prolonged exposure to sunlight, rain, and other outdoor elements. Fresh, clean, quick-drying cushions that are stain resistant and 100% recyclable.

Domestic Custom Cushions:

Our exceedingly comfortable custom cushions are made of high-density foam wrapped in Dacron and then finished with 100% solution-dyed Acrylic fabrics from Sunbelievable™ or Sunbrella®. They are a beautiful addition available on most of our casual furniture frames.

All Alfresco Home custom cushions are designed to complement our frames with the correct choice of knife edge or box-edge construction and the proper buttoning solution. Each style has been selected with that collection's comfort, design, and durability in mind.

Alfresco Home. Outdoor Living Made Easy.

Alfresco Home offers premium technology cushions on the 40 and 340 series collections using the BEE WETT® cushion construction.

BEE WETT® Cushion Construction:

The 40 and 340 Series furniture collections by Alfresco Home are made of the highest quality materials. The same certainly applies to the cushions. Our BEE WETT® range consists of special weather-resistant cushions that you can simply leave outside. The removable covers are washable, waterproof, and UV-resistant.

Unlike normal foam, the unique BEE WETT® filling does not absorb moisture. The open fabric structure on the bottom of the cushion drains all moisture efficiently. This ensures that your BEE WETT® cushion dries rapidly. The BEE WETT® cushion is upholstered with a 100% solution-dyed Olefin material that is not only resistant to rot and fungus, but is also UV-proof, soft, comfortable and damp-proof. The BEE WETT-line features premium technology on the cushions, which ensures that the cushions dry quickly after heavy rain.

BEE WETT® Cushion Care:

For many years, we have been supplying furniture together with the highest-quality, care-friendly BEE WETT® cushions. One of the surest ways to extend the life of these attractive cushions is to maintain the fabric correctly. This can be done simply by brushing off dirt before it becomes embedded in the fabric fibers and to immediately remove spilled liquids and other substances. Do not use any caustic cleaning agents or chlorine. You can leave the cushion covers to soak in a soap and water solution and/or wash them in a cool water delicate fabrics setting. Always rinse out the covers thoroughly. In order to retain the cushions' water-repellent layer you can add a little ScotchGard or similar to the last rinsing.

Do not put the cushion covers in a spin dryer or dryer and do not iron them. As soon as the washing machine program is finished, immediately replace the wet cover around the cushion filling so that the natural elasticity of the fibers will pull the cover nice and tight around the filling as it dries.

The open fabric structure on the bottom of the cushion drains all moisture perfectly

sunbelievable

sunbrella

On the following pages, please browse our standard fabric selections.

Sunbelievable™ fabrics are manufactured by Z-Wovens, considered among the most capable and responsive suppliers of upholstery fabrics in the world. An expert manufacturing team and a dependable supply chain management team promise a level of service and commitment to their customers that is unparalleled.

Z-Wovens manufactures unique aesthetic and performance features into the very heart of these woven fabrics—literally from the fiber up. **All Sunbelievable Fabrics are 100% solution-dyed Acrylic to resist fading and are designed to be luxuriously soft, yet amazingly durable, stain resistant, and cleanable** — even with bleach. Perfect for decks, patios, poolside or in the garden.

- Z-Wovens Fabrics has been a major supplier of performance fabrics to the indoor furniture industry for many years
- Created and designed in North Carolina
- Z-Wovens added their Sunbelievable brand in 2017 with the launch of a Solution Dyed Acrylic and Polyester Blend with great styling, colorations and durability
- Given the success of the outdoor fabric launch, Sunbelievable subsequently added the 100% Solution Dyed Acrylic collection of fabrics including the Lifeguard and Hang Ten series.
- Sunbelievable Lifeguard and Hang Ten fabrics come with a **5 year performance warranty**
- The Lifeguard Patterns on San Simeon are the latest generation
- Alfresco Home's San Simeon EverTeak™ collection uses the Sunbelievable Lifeguard fabric

Performance + Beauty

All Sunbelievable™ Fabrics meet the highest performance standards of any outdoor fabric. Solution-dyed acrylic fibers and an exceptionally fine solution-dyed polyester warp enable our designers to produce a luxuriously soft, more intricately patterned fabric that is also amazingly durable, stain resistant, fade resistant, and cleanable — even with bleach. However, performance alone does not sell the product. We believe that color, beautiful designs and luxurious textures do. Each distinctive fabric we create easily correlates with the entire collection, but can also brilliantly stand on its own. Your retail customers will appreciate how easily our collections coordinate.

Upholstery Care

Regular vacuuming of your upholstered furniture will enhance the beauty and longevity of your fabric. Treat spills promptly. Gently Blot away the spill with a clean, dry absorbent cloth. Do not rub. Attempt removal of dried contaminants with a soft brush or dull knife prior to using a wet treatment.

While all stains may not be completely removed, these guidelines are suggested for best results.

METHOD A

Use a water-based soap solution of 1 tablespoon laundry detergent per 2 cups warm water. Dampen the cleaning cloth and Gently Blot away the spill. Do not rub. Rotate the cleaning cloth often and rinse with water to ensure complete removal of all soap residue.

METHOD B

Use a mild solvent-based residential upholstery cleaner and follow the manufacturer's instructions.

Contaminant and Cleaning Method

Chocolate, Coffee
Method A
with warm water

Ink
Method A
with rubbing alcohol

Fruit
Method A
with cold water

Milk, Wine, Soft Drinks
Method A

Important! Test a small hidden section of the upholstery to ensure fabric and color are not affected. For severe stains, consult a professional upholstery cleaner.

Cast and Extruded Aluminum

22, 55 and 310 Series

The Alfresco Home cast and extruded aluminum collections offer several frame-finish options. We stock the large majority of product in the frame finish shown in our catalog. Casting benefits include strong, durable, clean and quality finished goods.

These products offer the following features:

- Highly durable, multi-step powder-coated finishes
- Surfaces inspected, pre-treated, and washed in a cleansing solution
- Hand-applied topcoat finishes are bonded, clear-coated and UV stabilized
- Stainless steel/galvanized hardware where applicable
- Adjustable feet levelers

To protect Alfresco Home aluminum furniture:

- Frame cleaning with mild soap only. In no way use harsh chemicals or abrasives to clean furniture.
- Annually clean product. Thoroughly remove dirt, grime, debris, and water.
- All frames and product exposed to chlorine, salt water, and or other chemicals need to be hosed off immediately.
- If mold or mildew should build up (which occurs on all outdoor products from surrounding elements of outdoor maintenance) it is recommended to use a mix of a 1/4 cup of bleach to 3 gallons of water and a soft non-abrasive sponge to best clean your furniture.
- Clean and dry thoroughly prior to storing over winter.
- Always drain any water that may have accumulated over winter or during cleaning.
- Protect finishes with commercially available covers when not in use. Covers are strongly recommended in extremely high heat and sun, as well as snow and cold conditions.

Everwoven™ All Weather Wicker and Aluminum frame

40, 46 and 353 Series

These products offer the following features:

- High density polypropylene wicker extrusions are hand-wrapped on powder coated aluminum frames
- Use of core and flat resin wicker extrusions
- Resin wicker is hand-woven wrapped over powder coated aluminum frames
- Fully welded aluminum frames for superior frame strength
- PE synthetic wicker with UV stabilizers on an aluminum frame

To protect Alfresco Home furniture with Everwoven™ All Weather Wicker:

- Use a damp cloth with mild soap and water to clean dust and stains from the all-weather wicker furniture. Do not use chemicals, bleach, or abrasive cleansers in cleaning any part of furniture.
- Frames exposed to chlorine and salt water or any other chemicals must be hosed off immediately after use.
- Table glass is tempered and can be cleaned with standard glass cleaner. Do not use HOT water on glass.
- Clean and dry thoroughly before storing over winter. Always drain any water that may have accumulated during cleaning or over winter.

Everwoven™ All Weather Wicker, Teak and Eucalyptus Wood

40, 46 and 340 Series

High density polypropylene wicker extrusions are hand-wrapped on aluminum frames and combined with FSC® certified eucalyptus wood components (legs, arms, arm rests). This FSC® wood is harvested in an eco-friendly manner, responsibly grown, gathered, and replenished to prevent deforestation. Eucalyptus wood is organic and its naturally high oil count makes the wood, and subsequently the furniture, resistant to decay, insect infestation, and significant discoloration.

- FSC® Eucalyptus wood surface will organically evolve, expand and contract, change color and texture, and will vary as it ages.
- Checks and small hairline cracks and color changes are normal occurrence as the wood expands and contracts. This is not a defect but an indicator that it is time to oil your product.
- The finishes on our eucalyptus tables yield a stain-free and waterproof surface for approximately 12 months subject to use and climatic conditions.
- Each table and chair is hand-finished; no two pieces will be alike. Additionally, each piece of wood absorbs the hand-applied patina differently, so variations on any table top or chair part are to be expected.
- Over time, Eucalyptus wood products develop a natural grey patina. This is normal and should be expected. The Alfresco Home FSC® Eucalyptus products have a hand-stained finish that simulates a natural, weathered-wood look.

FSC® certified Eucalyptus 46 Series

- Upon purchase, we recommend using a hardwood cleaner and clear timber oil with UV protection to help protect your wood products from the natural aging process.
- Before oiling, check for any residue build-up, if this occurs a light sanding is recommended.
- Manufacturers recommend that you oil your furniture in the shade or under cover. Also, oil and seal the product completely on top and underneath with a clear timber oil. After oiling, wipe off excess oil and allow oil to dry in the shade away from direct sunlight, then wipe off with clear rag to remove any excess oil. This process should be repeated every 3-6 months for best product lifespan.
- The frequency of oiling will vary according to climate conditions in your area and direct exposure to the elements.
- Without protection and regular maintenance the products may develop cracks, checks (small surface cracks), and splinters as well as color fading.
- We recommend using a clear timber oil to help maintain the wood surfaces. Always test a small area and follow instruction when applying oil to surface. We recommend Golden Care Hardwood Protectors available online or at your local home center.
- Checks and small hairline cracks are normal occurrence as the wood expands and contracts. This is not a defect but an indicator that it is time to oil your product.
- Should your wood product develop some cracks or splinters over time, sand the area very lightly.
- Covers are strongly recommended in extremely high heat, sun or pollution areas. We recommend that product be stored with undercover protection during winter months.
- Soapy water and a soft sponge or non-abrasive cloths can be used to lightly clean product frames from normal dirt, grime, and dust buildup. Do not use chemicals, bleach, or abrasive cleansers in cleaning any parts of your furniture.
- After exposing any wood collection to the elements, it is best to tighten any loose fittings and joints. It is recommended to do so every 3-6 months.

Polywood composite table tops

300 and 353 Series

- Color of these 100% polystyrene tables runs throughout the entire density of the piece.
- We recommend the use of coasters and/or placemats with all glass products (such as glass, cups, plates, bowls, vases, etc.) as sunlight shining through the glass can "burn" the composite and cause discoloration. Be careful not to drag glass or ceramic ware across surface so as to avoid scratching the table top.
- Soapy water and a soft sponge or non-abrasive cloths can be used to lightly clean product frames from normal dirt, grime, and dust buildup. Do not use chemicals, bleach, or abrasive cleansers in cleaning any parts of your furniture.

Premium Everwoven All Weather Wicker w/ Aluminum and FSC Teak Components 40 Series

Biculair Wickerwork 40 and 340 Series

- All 40 and 340 series collection items are entirely hand-made.
- Frames are manufactured in aluminum with no concessions to wall thickness and finish ensuring long durability.
- All hardware is made of high quality stainless steel and frames are anodized in a matte or high gloss finish and further treated with epoxy for ultimate beauty and lasting durability
- Unique to these collection, all frames are woven with proprietary Biculair Everwoven which was originally developed for the contract outdoor market.
- The highly durable imitation rattan fibers are made of High Density Polyethylene (HDPE) and are fully weather-resistant, colorfast, recyclable and environmentally friendly.
- The color of these HPPE fibers retains their natural quality and color. This top class quality of the wicker work has been tested and supported by various Applied Scientific Research organizations and stands out in its class.

Cushions 40 and 340 Series

- Featuring BEE WETT Cushion premium technology constructed to be extremely weather-resistant. Made with a removable cover in top quality outdoor washable fabrics are waterproof, UV-resistant.
- Utilizing the unique BEE WETT construction, the cushion does not absorb moisture. The open fabric structure on the bottom of the cushion drains all moisture perfectly. This ensures that the BEE WETT cushion dries quickly.
- In order to maintain a BEE WETT cushion and fabric cover correctly. Simply brush off dirt with a soft non-abrasive brush or cloth and immediately remove any spilled liquids or other substances.
- Fabric covers can soak in a soap and water solution and can be washed in a cold water delicate fabric environment. Upon removing the cover from the washing cycle, re place the wet cover around the cushion filling so that the natural elasticity of the fibers will put the cover nicely around the filling as it dries.
- Always rinse out covers thoroughly and if you choose, apply a Scotch Guard outdoor resistant layer.

FSC® certified Teak

314 Series

Our FSC® certified grade A/B Teak collection products are fine sanded to a natural patina. Teak Wood will organically evolve, expand and contract, change color and texture, and will vary as it ages. Small hairline surface cracks and checks are normal in any wood products and are not considered a defect.

Features and Maintenance EverTeak™

ALFRESCO HOME
Outdoor Living Made Easy

EverTeak™ (316 Series) is made of a proprietary blend of Polystyrene (PS) and is engineered using a polymer composed of unique virgin plastics. It contains no cellulose-based fibers, which makes it a perfect material for outdoor furniture. This product is constructed using stainless steel hardware.

EverTeak™ Beauty

EverTeak™ has the appearance and touch of natural teak. Each piece is also simulated with natural wood grain details, both on the surface and within cross sections.

The EverTeak™ manufacturing process is carefully executed to produce a slight and unique variation in color for each piece, further resembling natural wood. Additionally, the depth of the color also varies depending on lighting spectrums and viewing angles.

EverTeak™ Features

- Innovative engineered polymer composed of unique virgin plastics
- Unmatched realistic wood beauty and feel
- Surface color through full board slat
- Manufactured with premium UV inhibitors
- High strength material stabilized with aluminum in longer board spans
- Water repellent surface minimizing moisture absorption
- Fully recyclable material

EverTeak™ Benefits

- Environmentally friendly
- Strong, durable with minimal maintenance
- Looks and feels like natural wood
- Aluminum supports prevents warping in tables and other long spans
- Natural and minimal fading occurs. Color throughout board slat helps maintain original appearance overtime
- PPE material and surface finish helps reduce stainability and makes timely clean-up routine with all-purpose household or patio furniture cleaners
- Minor repairs simple with scouring sanding pad

EverTeak™ Ease and Care

EverTeak™ requires no painting, staining, or waterproofing. Consumer may choose to apply a commercially available outdoor synthetic wood protectant for maximum protection.

EverTeak™ surface is resistant to alcohol, juice, and coffee spills under normal use and does not stain from common household liquids. Cleaning is simple – a mild soapy solution with a soft cloth is usually sufficient to remove dirt and debris.

Oil stains (plant and animal-based oil) on the surface can be removed by using a soft-bristled brush to clean with baking soda or non-abrasive cleaners.

While typically resistant to household liquids and stains, it is important to clean your EverTeak™ furniture regularly and not allow residue to build up on the surface that will make cleaning more difficult.

Everyday scratches and scuffs are normal and can be repaired using a scouring pad to sand lightly with the grain. Deeper gouges require the use of wood putty to repair.

Care should be taken not to place hot objects like pots, pans or grill tools on EverTeak™ as they will scorch the surface.

EverTeak™ Durability and Testing

All EverTeak™ materials have been specifically designed and rigorously tested for outdoor environments. Given normal use, we are pleased to provide 3-year limited residential warranty on the synthetic wood against defects in materials and workmanship that impair the use of the product.

Range of Temperature: From -10° to 158° Fahrenheit (Results from compressive and flexural strength testing with SGS approval)

UV Inhibition: Four years of exposure to sunlight (Xenon arc 300 W UV simulator for 448 Hours)

Limited Residential Product Warranties

Alfresco Home furniture is warranted against all manufacturer defects in materials and workmanship for the original owner. Proper care of our products is required to support the benefits of this warranty.

Warranty General Terms

- Frames are warranted against defects in materials and workmanship that impair the use of the product.
- Alfresco Home reserves the right to inspect all items claimed to be defective.
- All warranty claims are made to the original purchaser with proof of purchase.
- Under the terms of these warranties, the manufacturer will repair or replace any item if deemed necessary. If discontinued, it will be replaced with a similar style and finish.
- All warranty claims must be submitted in writing by the retail vendor with complete information including invoice information, date of purchase and photos accompanying the claim.
- Any items used for commercial purposes void these limited warranties.
- Warranties are not transferable.

Warranty Exceptions

- Misuse, fire, freezing, and acts of nature void these warranties.
- General frame rusting on iron frames, including rust and rust drips is not covered.
- Damage to frames, welds, or wicker due to improper assembly and improper use and care (including overwinter care, exposure to water and exposure to sub-freezing temperatures), customer negligence, and/or abuse, are not covered.
- Damage outside of normal wear and tear (chips, scratches, cracking, scuffs, rips) including exposure to the elements, oils, spills, fluids, chemicals or any other causes are not covered.
- Fading or discoloration that naturally occurs with wood products is not covered.
- FSC Eucalyptus and other FSC Hardwood tables and components have a hand applied finish that creates a natural weathered effect. Variation in color and tone as well as slight surface imperfections are deemed as normal and not covered.
- Glass table-top damage, regardless of the timeframe or occurrence, is not warranted.

Cast and Extruded Aluminum Frames

- 22 series: 5 years from the date of purchase on frames, 2 years on finish and wicker, and 1 year on sling. GRC top, LP Burner
- 55, 310 series: 5 years from the date of purchase on frames, 2 years on finish, and 1 year on LP Burner components.

For Cast and Extruded Aluminum frames, the limited warranty covers broken welds, broken arms, and broken legs. Improper assembly, improper use and care, customer negligence and abuse are not covered.

(See above Warranty Exceptions)

Cast/Extruded Aluminum and Everwoven™ All-Weather Wicker

- 22 series: 5 years from the date of purchase on frames, 2 years on finish and wicker, and 1 year on sling.
- 46 Series: 3 years from date of purchase on aluminum frames, 2 years on finish and wicker.

(See above Warranty Exceptions)

Everwoven™ All-Weather Wicker

- 353 Series: 3 years from date of purchase on frames, 2 years on finish and wicker, and 1 year on polywood composite table-tops.
- All Weather Wicker is warranted against peeling, cracking, and fading.

(See above Warranty Exceptions)

Eucalyptus Wood and Everwoven™

- 46 Series: 3 years from date of purchase on aluminum frames, 2 years on finish and wicker and 1 year on FSC Eucalyptus Wood.

(See above Warranty Exceptions)

Extruded Aluminum and Polywood Composite, Textile and Synthetic Rope

- 300 Series: 3 years from date of purchase on frames, finish, polywood composite and synthetic rope, 2 years on textile.

Premium Everwoven All Weather Wicker /Teak/Aluminum Collection

- 40 and 340 Series: 3 years from date of purchase on frames, finish of Biculair Wicker, Aluminum Frames and Cushions.
- Natural aging of Teak and Cushions not warranted.

EverTeak™ Composite

- 316 Series: 3 years from date of purchase on frames, 1 year on Cushions, and 3 years on PhiferTex Slings.
- Natural aging of EverTeak not warranted.
