Index.....	301-304

At the time of catalog printing we have listed some of the environmentally friendly products we carry on page 224. There you will find organic soils, controls and products. As our research continues, there will be more of these "sustainable" products available throughout the year, so if you do not see a product you are looking for, please call any of the Griffin locations and ask customer service what new products are available. Keep an eye on our web site and look for future educational seminars as we share our progress with you.
