Kord FiberGrow® Pak Strips

FiberGrow® is Better

Automatic: These rugged strips come out of the carton easily and run through a flat filler perfectly. They separate quickly with no sharp corners. The KF Series fits 11" x 21" standard flat.

Specialty Strips: The S144 strip fits the 144 plastic carrier and the NC 142 fits the NC 142 Carrier, listed on page 116.

Kord FiberGrow® Pots

Better Quality

FiberGrow® breathes much like clay so plants are able to develop much healthier root systems because of the improved aeration. This is especially important in the winter when soil in plastic pots often remains too moist for good root development. Larger sizes available.

| ITEM # | DESCRIPTION | DIA. X HT. | QTY/CS | PRICE/CS |

FiberGrow® Hanging Pots

FiberGrow® enhances customer appeal and increases profit potential. It is strongly suggested that short-term annual crops planted in soilless mix use the Grommated Hanging Baskets. Clip-on Swivel Wire assembly and hanger should be used for longer-term/heavier soil crops.

TEX-R® GEODISC™

Texel # 103031

Patented technology involves coating a high quality non-woven Tex-R® membrane with SpinOut® resin. On contact, sprouting weeds go into a dormant state and stop growing.

Geodiscs™ control weeds in container production

Tex-R® Geodiscs™ control weeds in container production while letting fertilizers reach the roots. These UV-stable discs are cost-effective and reusable. Double up on cost-cutting: less labor on hand weeding, less money on herbicides. (use squares for Pot-In-Pot production)
