# The Best Ground Cover You Can Buy Lumite 994 - The Grower's Choice

## 994 Ground Cover

This tightly woven fabric, constructed of tough UV stabilized polypropylene yarn, is designed to inhibit weed growth and improve the aesthetic appearance of professional nurseries.

### Lumite's ground cover is:

- UV Stabilized for extended outdoor life
- Low maintenance
- A non-chemical solution for weed infested growing areas
- A cost effective superior alternative to other methods

### Used for:

- Landscaping
- Shades structures
- Greenhouses
- Under containers
- Under benches

## Easy To Install

Available in convenient wide widths, this product can be quickly installed to provide years of service. Simply roll the product out and tack it down.

- Is available in widths up to 15'6"
- Has green stripes every 12" for easy pot alignment
- Is built tough to resist tears and punctures

## Permeable To Air and Water

994's tightly woven design allows water and nutrients to pass through, in addition to allowing the ground to breathe.

### The woven fabric:

- Reduces puddling
- Is resistant to most chemicals
- Will not rot, mildew, or become brittle in cold weather
- Helps eliminate odors

## Ground Cover Staples

ITEM #	DESCRIPTION	1-3	5-UP
78-2510	6"/8 ga. 100/bag	\$23.40	\$21.06
78-2515	6"/11ga. 1,000/cs	81.00	72.90

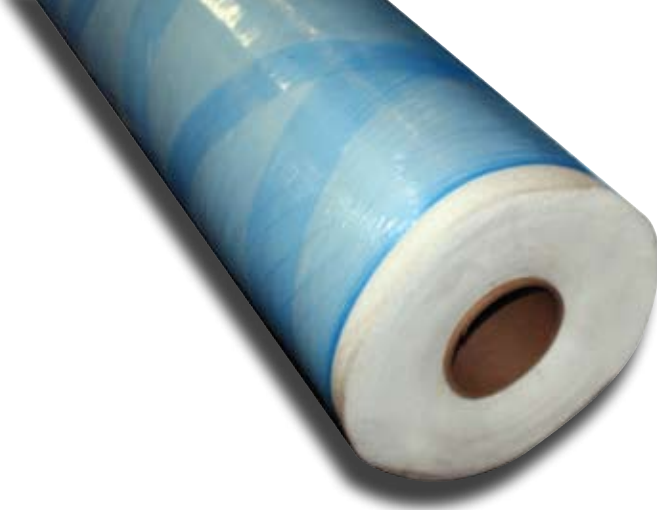

# Winter Protection Fabric

Flexible, Blanket material used for **Winter Protection** of plants. Great resistance to tearing. Applied directly on shrubs or containers. Offers protection: **Ice, Cold, Snow, Winds, and Temperature Variations.**

- 5-7 year life expectancy.
- 6 oz. per square yard.

ITEM #	DESCRIPTION	PRICE PER ROLL
81-730200	Roll 12' x 150'	\$265.62
81-730400	Roll 15' x 150'	332.03

\*Other width and lengths are available. Call for more information.

## Protective overwintering insulation sheeting for nurseries and greenhouses.

Flexible, lightweight polypropylene foam blanket providing maximum protection of greenhouse flowers, perennials, and nursery plants. Ideal for covering cold frames, hot beds, and for added insulation in overwintering structures.

*White poly is recommended for covering Microfoam*

### Lightweight

20 lb. 72" x 225' roll

### Chemically Inert

Unaffected by grease, water, solvents and chemicals

### Waterproof

Does not absorb water

### Reusable

Flexible even in cold weather; rolls up easily for removal and storage

## Single Layer Sheets

ITEM #	SIZE	1-5	6-19	20-UP
78-4925	72" x 225'	\$339.45	\$314.72	\$294.49

## Laminated - Single Layer Sheets

Laminated w/3mil white P/E

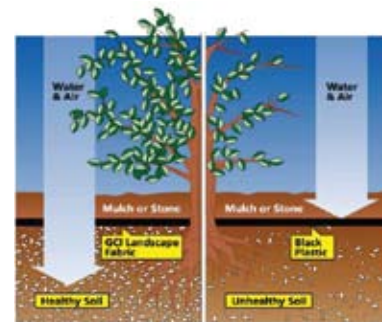

ITEM #	SIZE	1-5	6-19	20-UP
78-4950	12' x 100'	\$702.15	\$651.00	\$609.15

## Professional Non-woven Landscape Fabric

- Gray polypropylene material
- Felt like - high water flow material
- Heavy-weight 3.0 oz. per sq. yd./25 mil
- Use under bark mulch or stone
- Controls weeds
- Keeps bed neat
- Lets water through
- Tough & durable

ITEM #	SIZE	1-11	12-UP
78-2625	3' x 100'	\$27.45	\$22.78
ITEM #	SIZE	1-2	3-UP
78-2630	6' x 300'	\$180.11	\$149.49
78-2635	12' x 300'	327.47	271.80

## The Heavy One Woven Landscape Fabric

- Black polypropylene brushed woven material
- Heaviest weight fabric 4.75 oz. per sq. yd./28 mil
- Brushed Polypropylene conforms easily to the ground, while top "Fuzzy" surface holds mulch or stone in place

ITEM #	SIZE	1-2	3-UP
78-2650	12' x 250'	\$439.53	\$364.81

## Crop Cover

AgroFabric works by establishing a stable, favorable microclimate by capturing extra heat during the day - and then slowing the loss of stored heat at night from the soil. AgroFabric "floats" directly over crops without suffocating, crushing or breaking delicate plants. It's porous to air, water and nutrients and UV stable to protect your crops even more. No depending on outside power or fuel sources. You can even combine AgroFabric with irrigation for an extra measure of insulation during the seasonal climate changes.

### PR019 - Lightweight

- .55 oz per sq. yard
- Provides up to 4°F frost protection for high-value, frost-sensitive vegetables
- Establish spring transplants, protect from late frosts, extend the growing season and increase yields
- Excellent windbreak, offers effective insect control
- Transmits 85% light
- Easy to apply and remove

#### Stock Sizes

ITEM #	DESCRIPTION	1-9	10-24	25-UP
78-2026	6' x 250'	\$39.48	\$37.50	\$35.53
78-2031	6' x 2550'	381.97	362.87	343.77
78-2036	13' x 300'	88.82	84.38	79.94

## Heavy Frost & Cold Protection Crop Cover

### Spunbonded Polypropylene

Dupont fabric has a similar crop response to AgroFabric by creating a similar microenvironment. Used as a floating cover, it will last 2-3 seasons or more. Dupont Fabric can be used for frost protection up to 6°F, insect protection or for over-wintering, and will last for many seasons.

#### Custom Size / Direct Shipment Only

The four widths shown below can be ordered in lengths from 50 ft. to 500 ft. in 50 ft. increments. Sold as direct shipment only, FOB North Carolina.

#### Specifications:

Approx. 10mil, 1.25 oz/yd<sup>2</sup> White Spunbonded polypropylene, 70% transparent.

#### Stock size available from our warehouse

ITEM #	DESCRIPTION	1-9	10-24	25-UP
78-2045	15' x 300' Dupont 1.25oz	\$263.94	\$250.74	\$237.54

ITEM #	DESCRIPTION	PRICE PER SQ. FT

## Slitted Row Tunnels

Pre-cut crosswise slits provide a method of ventilating hot air in periods of extreme heat. At night the slits remain closed, reducing the rate of convective heat loss and help to maintain warmer temperatures inside the tunnel. Pre-slitted row covers usually provide from 1°-4°F. frost protection, but more importantly, they elevate daytime air temperatures from 10o-30°F, depending on the sunlight levels.

#### Specifications:

.5 mil linear low density clear polyethylene, 95% transparent.

#### Uses:

Slitted row covers are best suited for northernmost climates where light levels are poor, and the spring warming trend is very slow.

ITEM #	DESCRIPTION	QTY	PRICE
78-2296	76" Row Cover Hoops 10" Galv. Wire	100	\$88.20
