Dear Griffin Customer,

Thank you for being a loyal Griffin customer and using the latest in sustainable pest control. Griffin's GGSPRO Technical team has been at the cutting edge of developing integrated biological control programs to assist growers with pest control challenges. Griffin is pleased to announce that we have partnered with Syngenta to make the Bio-Line™ product line of biological control agents available to our customers. In addition to providing a full range of BCA's, Syngenta has pioneered the use of innovative packaging for many biological control agents that reduces labor, improves efficacy or both. To learn more about Bio-Line visit their website at [www.syngenta-bioline.co.uk/america.htm](http://www.syngenta-bioline.co.uk/america.htm)

Syngenta is a leading provider of products to the horticultural industry, home to world class genetics from Goldsmith, Yoder and Fisher and soilless mixes through the Fafard companies. Syngenta also provides our industry with important products such as: Avid, Bonzi, Citation, Flagship, Medallion, Subdue and many others. GGSPRO, Griffin's Technical Service team, is a leader in integrating BCA's with compatible chemistries where appropriate. Our technical team and sales force participates in ongoing education to insure growers receive the latest and best information in this ever changing field.

Griffin is grateful for your business and we look forward to addressing any questions that may arise through your sales representative or a member of the technical support team.

Sincerely,

Rick Yates  
GGSPRO Technical Services Manager
